## 5, 4, 3, 2, 1...BLAST OFF!

I heard about a new space rocket called 'The Dragon' that was launching in America for NASA space company. My brothers and I watched the live feed online and saw it blast off! It was so exciting! My Mum checked where and when we might be able to see it but it was too light outside. There was another chance later that night but Mum said that even if I did stay up late I still

probably wouldn't be able to see it...but I didn't listen! I stayed up late and watched in the right place. Suddenly I saw it! It was like a glowing red dot flying through the sky. I ran upstairs to tell Mum and Dad and they asked our friend who has a telescope if they could see it too. She took a photograph and sent it to us. I'm so happy I got to see it in real life!

This is the photo from the telescope. It is hard to see, so I drew a circle around it.

## JOKE CORNER

Why can you never fight a joke?...Because they always have a punch line!- Jacob Y4

What do you do is someone rolls their eyes at you?...Pick them up and roll them back to them!- Tia Y2

If you have any jokes, please send them in for the next issue.

## Brawddeg y Wythnos

Esgusodwch fi.  
Excuse me.

## This Week's Prayer

Bless the dawn and  
bless the sun: Bless  
the morning just  
begun.

Bless the light and  
bless the day: Bless  
us in our work and  
play.

Bless the earth and  
bless the sea: God  
bless you and God  
bless me.

Amen

## Abbie's Ice-Cream Parlour!

I would like to share a product review of my fantastic home ice-cream maker that I had for my birthday in May.

I love this ice-cream maker because it is:

- Easy to use.
- Only needs the same few ingredients, plus different fruits for flavours.
- Is a great activity for me while being at home this summer!
- You can add different toppings for your family.
- The ice-cream tastes great, just as if it is from an ice-cream parlour!

I have so far made banana and strawberry (with real fruit added), mint choc chip (green colouring was needed) but my favourite was chocolate.

Just freeze the special mixing bowl for 12 hours first. Most ice creams are made with just: milk, double cream, icing sugar, fruit, flavour extracts and colourings can be experimented with.

## Carys' Stunning Paper Flowers

Carys (Y5) has been doing some paper craft this week. She found a website online which taught her to make these incredible paper flowers - Da iawn Carys!

# World Oceans Day!

**On Monday 8th June we celebrated World Oceans Day.**

Our school Twitter feed was taken over by lots of children's ocean artwork, if you didn't see it, make sure you check it out.

This is Lucas' poster for World Oceans Day, to raise awareness of the danger of plastic in our oceans. He used stickers and pictures from magazines to show his favourite sea creatures surrounded by plastic toys. He also used plastic bags to make jelly fish and seaweed and sequins to represent the micro plastics.

We think you have done a brilliant job - Well done Lucas!

## Up, Up and Away

In Y2 the children have been learning about transport. Mrs Roberts set them a challenge to design and make a hot air balloon. Here is Cora's story:

Me and my Mum did experiments to make a hot air balloon fly. It took us four attempts but eventually we did it!

We used tissue paper, glue, wood cane, copper wire and tin foil. We had to pick materials that were light weight. The first one was too heavy, the second one had too much glue and not a good seal. the third one was with a plastic bag...that melted, oops. The fourth one was the best and when it went up, it was really exciting.

Amazing Cora, you didn't give up when it got tough. We love your hot air balloon!

# Moooove Over Matthew!

## Nature Lesson

Matthew (Y3) has been loving going on his family walks.

The cows now come to greet him on his daily walk in the village!

## Messy Craft with Haikey

I think this would be fun for everyone! It involves a lot of mess (which I think everyone is good at) try this...

### You will need:

- A bottle (cut into 2, cut it about an inch from the bottom)
- Liquid soap mixed with water.
- A bowl to put the soap mixture in.
- An old sock
- Scissors (an adult to help)

### Method:

Carefully cut the bottom end of your plastic bottle off, about an inch from the bottom. You just need the top part of the bottle. Get your sock and put it over the end which you cut. Pour the soap mixture into a bowl.

### Now here is the messy part!

Dip your first half of the bottle into the liquid and start blowing!!! The link below shows a video of how to do it on YouTube - ENJOY!!! 😊

## Hit the Deck!

At the weekend me and my sister Chloe (Reception) have been helping our Dad and Grandad build a new decking for our garden. We used a real hammer and drill. It was so much fun. Chloe even built a toy robot and sofa.
